<b>The Plasma Physics Experimental Program</b>	<b>1</b>
EP-01 – Spatially Resolved Measurement of the Electron Density in Laser Produced Plasmas . . . . .	1
EP-02 – Status of PHELIX . . . . .	2
EP-03 – Upgrade of the nhelix Laser System at GSI . . . . .	4
EP-04 – Stopping Power of Hydrogen for 100 keV/u Cu Ions . . . . .	6
EP-05 – Magnetic insulated plasma targets for ion beam plasma interaction experiments . . . . .	7
EP-06 – A fast Algorithm for Phase Detection in TOF Measurements . . . . .	8
EP-07 – Heavy ion charge state and velocity dynamics during the stopping process . . . . .	9
EP-08 – Laser produced chlorine plasma radiation studies for x-ray scattering experiments . . . . .	10
EP-09 – A Fast 6-channel pyrometer for Temperature Measurements of HED Matter generated by Intense Heavy Ion Beams . . . . .	11
EP-10 – Measurements of heavy ion beam profiles in gases . . . . .	12
EP-11 – Optical detection of keV-electrons . . . . .	13
EP-12 – A New Plasma Physics Laboratory at the University of Castilla-La Mancha . . . . .	14
EP-13 – Ionization in homonuclear collisions of doubly charged ions . . . . .	15
EP-14 – Inertial Fusion Reactor Physics: effect of Activation and Radiation Damage of Materials, and Tritium emissions. . . . .	16
<b>Beam Transport and Accelerator Research and Development</b>	<b>17</b>
AC-01 – Beam Emittance Measurement for Channel-based Ion Beam Transport . . . . .	17
AC-02 – Study of Kink Instabilities in Plasma Channels . . . . .	18
AC-03 – Measurements of an Electron Beam Assisted Laser Ion Source . . . . .	19
AC-04 – Status of Accumulator Ring Simulation . . . . .	20
AC-05 – Beam Simulation in Toroidal Magnetic Field . . . . .	21
AC-06 – Beam Injection Studies Using a Gabor Lens . . . . .	22
AC-07 – The Frankfurt Funneling Experiment . . . . .	23
<b>Target Theory</b>	<b>25</b>
TT-01 – Studies of Strongly Coupled Plasmas at the GSI Future FAIR Facility . . . . .	25
TT-02 – LAPLAS: Laboratory Planetary Sciences at Future FAIR Facility . . . . .	27
TT-03 – HIHEX: Experiment Design to Study Equation of State Properties of High Energy Density Matter at Upgraded SIS18 and FAIR . . . . .	29
TT-04 – Simulations of a Liquid Jet Target Using a Fast Extraction Scheme for the Super-FRS . . . . .	31
TT-05 – Potential of the CERN Large Hadron Collider to Study High Energy Density States in Matter . . . . .	33
TT-06 – Modeling the Interiors of Giant Planets . . . . .	35
TT-07 – Quantum molecular-dynamics simulations for warm dense matter . . . . .	36
TT-08 – Bremsstrahlung in dense matter and Landau-Pomeranchuk-Migdal effect . . . . .	37
TT-09 – Heavy Ion Stopping in Matter when the Beam falls on the Surface with a Small Angle . . . . .	38
TT-10 – The influence of Target Matter Porosity on Ion Stopping Characteristics . . . . .	39
TT-11 – Electron-Electron Collision Effects in Ion-Plasma Stopping . . . . .	40
TT-12 – Two-dimensional numerical simulations of a shell-shielded target driven by an intense co-axial heavy ion beam . . . . .	41
TT-13 – Modelling of transport and amplification of a short XUV pulse in a plasma with high gain . . . . .	42
TT-14 – Molecular Dynamics Simulations and Collisional Absorption in Dense Laser-Produced Plasmas . . . . .	43
TT-15 – Isochoric Heating of Solid Targets with Laser Produced Beams . . . . .	44
TT-16 – Radiative transitions in laser-generated aluminum plasmas . . . . .	45
TT-17 – Theory of X-Ray Thomson Scattering . . . . .	46
TT-18 – Collective Modes and Energy Transfer in Two-Temperature-Plasmas . . . . .	47
TT-19 – Relaxation of Dense, Reacting Two-Temperature-Plasmas . . . . .	48
TT-20 – Temperature Effects on Mixed Two-Stream/Filamentation Modes . . . . .	49
TT-21 – Instabilities in elastic accelerated solids . . . . .	50

<b>Hirschegg Workshop</b>	<b>51</b>
HW-01 – CAST - The Solar Plasma as Laboratory for Axions . . . . .	51
HW-02 – A Cryogenic Target Preparation System for LAPLAS Experiments at the SIS-100 . . . . .	52
HW-03 – Simulation of Laser-driven X-ray Backlighter . . . . .	53
HW-04 – Transition from periodic lattice to solid plasma in ultrashort pulse irradiation of metals . . . . .	54
HW-05 – Acceleration of Relativistic Electron Beams in Intense Laser Interaction with Foil Plasmas . . . . .	56
HW-06 – Acceleration of Relativistic EM Solitons in Intense Laser -Plasmas . . . . .	57
<b>Appendices</b>	<b>59</b>
AX-01 – Participating Institutes . . . . .	59
AX-02 – Publications 2004 . . . . .	61
AX-03 – Conference Contributions 2004 . . . . .	65
AX-04 – Theses 2004 . . . . .	69
List of Authors . . . . .	71
